SUMMARY

I am a passionate Full Stack Developer specializing in the MERN stack (Mongo DB, Express.js, React, and Node.js), with a solid foundation in building dynamic and scalable web applications. My long-term career goal is to establish my own IT Company, driven by innovation and a commitment to delivering client-focused solutions. In the short term, I aim to grow into a Project Manager role by leading development teams and successfully managing end-to-end project delivery.

CERTIFICATIONS

CERTIFICATION IN FULL STACK DEVELOPMENT (MERN) ILLINOIS INSTITUTE OF TECHNOLOGY, USA

MERN Full Stack Developer – Entri Elevate **APRIL 2025 - Present**

- Hands-on experience in front-end and back-end development using HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap, Node.js, and Express.js to build dynamic and responsive applications.
- Skilled in MongoDB with Compass, RESTful API development, and API testing using Postman and Thunder Client, with Axios and async/await for efficient data handling.
- Worked on end-to-end MERN stack projects, using Nodemon for server management and applying SEO concepts to enhance application performance and visibility.

PROJECTS

Entri Elevate | Fitness Journey Logger

Live Demo: https://cute-monstera-080750.netlify.app/ **SEP - 2025**

- Developed a cross-platform fitness tracking application enabling users to log workouts, set goals, and monitor progress efficiently.
- Implemented core features such as goal tracking, workout history management, and interactive data visualization using React.js.
- Designed a responsive and user-friendly UI with modern frontend practices to enhance usability and engagement.
- Integrated dynamic state management and optimized component rendering for improved performance.

Capstone Project: Joyful Food App

Source Code (GitHub): https://github.com/lazarjava/food-app.git Frontend Live URL: https://food-app-r6i1.vercel.app/

Admin Panel Live URL: https://food-app-3ytv.vercel.app/ **NOV -2025**

- Built a full-stack food ordering application with real-time order tracking and user-friendly interface.
- Developed responsive frontend using React.js, HTML5, CSS3, and Bootstrap for seamless user experience.
- Designed and implemented RESTful APIs using Node.js and Express.js for handling orders, users, and authentication.
- Integrated MongoDB Atlas for scalable database management with secure environment configurations.
- Utilized Axios, Fetch API, and async/await for efficient data handling and API communication.
- Tested and debugged APIs using Postman and Thunder Client to ensure reliability and performance.
- Developed an admin panel for order management, improving operational control and workflow efficiency.

TECHNICAL SKILLS – FULL STACK DEVELOPER (MERN)
Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, React Native, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST APIs
Database: MongoDB
Tools: Git, GitHub, Postman, VS Code
Deployment: Netlify, Vercel, Render

SOFT SKILLS
Adaptability

EDUCATION
Bachelor of Engineering (B.E.) in Computer Science **APR-2020**
Sardar Raja College of Engineering, Alangulam – Tirunelveli

DEVCARE SOLUTIONS PVT. LTD
US IT RECRUITER **OCT 2024**

- Sourced and screened candidates for various technical roles, coordinated interviews, and managed client communications.
- Developed strong communication, organizational, and time-management skills in a fast-paced professional environment.
